

*Oxford Audio has the perfect toys for you this Christmas - so why not treat yourself?*

**toy speaker**  
*from sonus faber*

Toys have always been synonymous with happiness and surprise, the same emotions the art of sound has conveyed from time immemorial. Play is also about spontaneity, embodied perfectly in this gem-like system of compact loudspeakers which are easy to place yet convey the full impact of music in all its variety. The Toy is perfectly at home on a side table; it will surprise and delight you when installed in a bookcase; and it will truly shine when you treat it like the true high-end loudspeaker it is by placing it carefully in your favorite room. The Toy proves the pleasure of music reproduced with clarity and nuance can be a gift to everyone.

**toy tower**  
*from sonus faber*

With the compact but ambitious floor-standing Toy Tower, Sonus Faber conveys all the colours and emotions of life-sized music reproduction with an even more intense, profound involvement than its smaller sibling. The Toy Tower delivers a complete acoustic picture of your favorite melodies that will simply carry you away. Cherish your new Toy Tower. Position it attentively and select its electronic partners with care. You will be rewarded, day after day, with an intensely passionate and soulful musical experience.

**toy center**  
*from sonus faber*

The Toy Center is engineered to reproduce the human voice with dynamism and precision. With its unique timbral balance and compact dimensions, the Toy Center integrates perfectly with other Toy models. It makes a simple but highly effective addition to Toy speakers used in multichannel and multimedia configurations - all of which benefit from the passionate and enveloping experience delivered with full intensity by the legendary quality of Sonus Faber loudspeakers.

*Christmas special. Order the Sonus Faber toy tower and center speakers together before 25th Dec 08 from Oxford Audio and you'll save money... call for more details...*
